April 20th, 2021, 12pm-1 PT

OEM/Physician Roles in the Insurance Industry

David Berube, MD, MPH, FACOEM
Rupali Das, MD, MPH, FACOEM

WOEMA/NECOEM Webinar
Presenters

Rupali Das, MD, MPH, FACOEM
Dr. Rupali Das is Senior Vice President and California Medical Director at Zenith Insurance Company and Clinical Professor of Medicine at the University of California San Francisco (UCSF) Division of Occupational and Environmental Medicine. She is President-Elect for WOEMA, the Co-Chair of WOEMA’s JEDI Committee and past chair of the legislative and educational committees.

David Berube, MD, MPH, FACOEM
Dr. David Berube is Vice President and Chief Medical Officer of Lincoln Financial Group, and is an Assistant Clinical Professor of Medicine in the Division of Occupational and Environmental Medicine at the Yale University School of Medicine, and the University of Connecticut School of Medicine. He is Treasurer of NECOEM.
Disclaimer

- The material and the opinions expressed in this presentation are the opinions of the presenters and do not represent the position of the presenter’s respective companies.

- The information contained in this presentation is meant to provide a general understanding of certain aspects of workers’ compensation. The information provided is not to be construed as legal or medical advice and is not meant to be a substitute for legal or medical advice.

- To the extent this presentation is based on data, the presenters do not warrant such data to be accurate or complete.

- No part of this presentation may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without express written permission.
Conflict of Interest Disclosure

- This presentation reflects the views, opinion, and thoughts of the presenters only, and not necessarily those of Zenith Insurance, Lincoln Financial Group, or WOEMA.

- Dr. Berube is employed by Lincoln Financial Group and Dr. Das is employed by Zenith Insurance. They will not discuss any products specific to their employers.
Today’s Goals

- Describe Key Elements of Disability and Workers Compensation Insurance Medicine

- Review How OEM Physicians Interface with the Insurance Industry
  - As treating providers
  - As Peer Review and IME practitioners

- Review Best Practices to Optimize High Quality Care and Minimize Disability
  - Evidence Based/ Standard of Care Rationale for Treatment and Opinions
  - Action Planning to Address Quality of Care, Stay at Work, and Return to Work Opportunities
Who Authorizes Payment of Insurance Benefits?

**Not a Medical Determination**

- Clinicians do not make claims acceptance or benefit decisions but their input impacts company decisions
- Clinicians provide medical treatment and opinions on medical causality, impairment, restrictions, and limitations.

**Benefit Decisions are Administrative (Claims and Legal)**

- Employer/Insurance carrier contract
- Statutes – State and Federal regulations and guidelines
Disability Insurance

Paid sick leave (payroll benefit)
- Short-term
- Long-term
- Individual
- Group
- State
- Social Security

Short-Term Disability (STD) Own Job
- Inability to perform Own Job due to restrictions
- Up to 6-12 months
- No healthcare coverage

Long Term Disability (LTD) Own Occupation Period
- Inability to perform Own Occupation as defined in National Economy.
- 12 to 24 months

Long-Term Disability (LTD) Any Occupation Period
- 24 months to age 65

https://www.bls.gov/bls/glossary.htm
https://www.usa.gov/disability-benefits-insurance
Workers Compensation Insurance

**Workers Compensation Insurance**
- Paid sick leave *(payroll benefit and medical benefit)*

**No Fault**
- **Employer paid if arose out of or occurred in the course of employment**

**Exclusive Remedy**
- **Cannot pursue other forms of recovery** unless employer uninsured

**Assured and Fixed Benefit**
- **Workers compensation establishes defined benefits**, which must be paid for by the employer

**Determined by Individual States or Federal Government for Federal Workers.**
- **Rules determined and vary by each regulatory body**

https://www.dol.gov/general/topic/workcomp
https://www.dir.ca.gov/dwc/medicalunit/toc.pdf
Terminology

**Impairment**

Clinically observable and often measurable alteration of body structure or function. A significant deviation, loss of, or loss of use of any body structure or function as a result of a health condition, disorder, or disease.

Can be objectively assessed, e.g., with AMA Guides

**Disability**

Definitions determined by statutes, regulations, or benefit plans. Generally defined as a functional limitation with difficulty carrying out activities such as ADLs, IADLs, Hobbies, driving, or gainful activity such as working, etc.

- Temporary vs. Permanent
- Partial vs. Total

**Potential Disability Benefits**

- Handicap Parking (public access benefit)
- Disability insurance (payroll benefit)
- Workers’ Compensation insurance (medical and payroll benefit)
- Social Security (medical insurance benefit, wage benefit)
Multiple Policies

**Benefits may be reduced** depending on the total amount payable by all policies in the event you are covered by multiple policies, such as social security, workers compensation, private disability plans, automobile insurance, etc.

Pre-existing Conditions

Unlike health insurance plans, disability insurance (payroll) plans **may not cover claims due to pre-existing conditions** – conditions for which treatment was recommended or provided that caused or contributed to the current impairing condition during specific periods of time.

Terminology

Accommodation
A *modification* or *adjustment* to a *job*, the work *environment*, or the *way* things are usually *done*

Restriction
A listing of activities that an individual *should not perform*

Limitation
A listing of activities that an individual *cannot physically or psychologically perform*

https://www.dol.gov/agencies/odep/program-areas/employers/accommodations
Key Stakeholders in Workers’ Compensation and Disability

Shared Stakeholder Interests
- Recover from illness/injury
- Return to work/function
- Avoid delays in care
- Provide cost-effective care
  - No cost-sharing in workers’ compensation
- Do no harm (Primum non nocere)
  - Weigh risks/benefits
  - Only do what is needed for recovery
  - Prevent further illness/injury

https://www.intechopen.com/books/occupational-health/understanding-the-stakeholders-as-a-success-factor-for-effective-occupational-health-care
Who Is Responsible for Managing Disability?

We All Are!

Worker
- Expertise regarding their jobs and their injury experience
- Active participation in own recovery
- Honesty regarding their experience

Clinician
- Recognize work-relatedness, value of RTW, use EBM
- Communicate with worker, employer, claims
- Set expectations, provide education, monitor function
- Recognize barriers to recovery

Employer
- Demonstrate honest care and concern for worker
- Accommodate modified duty
- Communicate: job duties, questions about care & RTW

Insurer
- Advocate for worker and employer
- Ensure cost-effective, appropriate treatment, care, compensation
- Follow the worker through the life of the claim

Physicians Interact With Insurance As

**Clinical Pearls:**
- Physician orders or opinions do not authorize, mandate, or prevent insurance payment of benefits.
- Treating clinicians should avoid inferring that patients will receive specific insurance benefits, with statements such as “I will put you out on disability, our I will put you out on workers compensation.”
- Similarly IME, Peer Review, and Utilization review opinions do not have benefit authority.

- Insurance company CMOs, Medical Directors, etc.
- Treating Clinicians
- Consulting Medical evaluators
  - Independent Medical Examinations
  - Independent Peer Reviewers
  - Utilization reviewers

https://www.healthcare.gov/glossary/preauthorization/
Roles of CMO/Medical Directors for Workers’ Compensation and Disability Carriers

- Serve as internal medical experts and educators
- Collaborate with other disciplines
  - Claims, nursing, legal, safety and health, actuaries, marketing, underwriting
- Serve as point of contact for peer review clinicians, treating clinicians, other partners
  - Ensure high quality, evidence-based care
- Provide input on internal and external policy and procedures
- **Promote processes that enhance recovery and return to work (SAW/RTW), and reduce disability**
- Facilitate prevention of future illness/injury

### Role of Treating Clinicians

<table>
<thead>
<tr>

<tr>
<td>Participate in treatment authorization/utilization review</td>
<td>✓</td>
<td></td>
</tr>
</tbody>
</table>

Three Treating Provider Opportunities for Patients with WC/Disability Claims

1. Do not say ‘No Work’ or ‘Unable to do their job.’
   - State medically based activity restrictions/limitations
   - Focus on specific body part/organ/system activities.
   - Draft so employer can determine if they can accommodate.
   - Provide end or re-evaluation date

2. Provide appropriate care
   - Provide evidence-based medicine; standard of care
   - Schedule re-evaluation based on expected recovery and need to change restrictions rather than on next appointment availability.

3. Ensure medical records provide a reasonable rationale
   - Obtain a detailed occupational history at first evaluation
   - Diagnosis, treatment, and restrictions should be supported by evidence based medical facts
   - Provide opinion on and rationale for causation of illness/injury

Additional Recommendations For OEM Practice

- Educate patients on their diagnosis, treatment, and prognosis
  - Set reasonable expectations on recovery course at the first visit

- Avoid use of opioids, sedatives, etc.
  - They may prolong recovery and prohibit return to work

- Document and address indications of delayed recovery

- Assess psychosocial factors as they may significantly affect recovery

- Pursue early options for resolution
  - But never compromise patient recovery
  - Return Patients to work promptly and appropriately
  - Focus on function

ACOEM Practice Guidelines: Return to Work.
https://www.aafp.org/afp/2014/0101/p17.html
Restrictions 101 (Detail Matters)

- No work from date a to b
- No use of left wrist from date a to b
- No use of left wrist more than occasionally, from date a to b
- No use of left wrist more than occasionally, with a force of greater than 5 pounds, from date a to date b
- No use of left wrist more than occasionally, with a force of greater than 5 pounds and/or with flexion extension greater than 15 degrees, from date a to date b
Workers’ Compensation
Why Emphasize Stay at/Return to Work?

Delayed Recovery Impacts
10% of Injured Workers

- 10%
- 90% Recover as Expected

And Accounts for 75% of Costs

- 25%
- 75%

Failure to Return to Work Early Predicts Chronic Disability

Detecting and Preventing Delayed Recovery

Red flags signifying delayed recovery

- Findings inconsistent with injury
- Pre-existing co-morbidities present
- Patient unwilling to follow recommendations
- Recovery takes longer than expected
- Discrepant findings when not at clinic

Address delayed recovery

- Document inconsistent findings
- Re-evaluate diagnosis and plan
- Re-assess comorbidities (Diabetes is a common risk factor)
- Consider biopsychosocial factors
- Consult with Insurance Medical Directors and claims staff
## Roles of IME/Peer Review Clinicians

<table>
<thead>
<tr>
<th>Activity</th>
<th>IME</th>
<th>Peer Review</th>
</tr>
</thead>
<tbody>
<tr>
<td>Complete a medical record review, contact treating providers and others for clarification as needed, address questions with a rationale for opinions.</td>
<td>☑️</td>
<td>☑️</td>
</tr>
<tr>
<td>Complete a claimant interview, physical examination, and noninvasive testing.</td>
<td>☑️</td>
<td></td>
</tr>
<tr>
<td>Opine on mechanism/causation of injury/illness/disease, dx</td>
<td>☑️</td>
<td>☑️</td>
</tr>
<tr>
<td>Opine on impairment and medically necessary r'/l's with start and end date</td>
<td>☑️</td>
<td>☑️</td>
</tr>
<tr>
<td>Opine on functional capacity/abilities</td>
<td>☑️</td>
<td></td>
</tr>
<tr>
<td>Opine on stay at work/return to work accommodations, recovery and prognosis expectations, maximal medical improvement</td>
<td>☑️</td>
<td>☑️</td>
</tr>
<tr>
<td>Opine on impairment rating – AMA</td>
<td>☑️</td>
<td></td>
</tr>
<tr>
<td>Opine on standard of care</td>
<td>☑️</td>
<td>☑️</td>
</tr>
<tr>
<td>Opine on medical necessity for treatment</td>
<td>☑️</td>
<td>*Utilization Review</td>
</tr>
</tbody>
</table>

Utilization Review

- Goals are to provide cost-effective, quality care
- Evidence based medical determination
- Outcomes:
  - Certification, modification, non-certification
- May be deferred if claim is not accepted or more information needed
- Who can provide decision
  - Certification: claims, nursing, physician
  - Modification, non-certification: physician, typically working for a UR Organization
  - National certification of UR organizations
IME and Peer Reviewer Best Practices

Peer Review and IME report characteristics that add value

- Full and impartial review, with no conflict of interest
- Opinion supported by rationale from evidence-based medicine and the standard of care
- Answers understandable by non-clinical claim managers, appropriately detailed and concise rationale
- Impairment, r’s/l’s addressed with reasonable start and end dates or dates for reassessment
- Identify poor quality of care or missed diagnoses, tests or other care opportunities
- Describe missed care coordination issues
- Describe a clinical management action plan
- Discuss prognosis for future return to work
- Speak with treating providers about any unclear issues or opportunities.

https://seak.com/physician-resources/
Strategies to Increase Record Review Efficiency

**Speed Read the Entire Record First - Develop a high-level Overview**
- Your next more detailed review will be better focused

**Use Computer Technology to Document Notes and Develop Report**
- Dictation
- Copy and paste tools
- Record organization tools

**Be Appropriately Succinct or Detailed**
- The length of a report does not directly correlate with its value nor efficiency

**Consider opportunities to eliminate the need for rework and addendums.**
- Speak with treating providers and insurance claim managers as needed to obtain clarification of issues.
  - Illegible records
  - Missing medical records
  - Unclear questions or questions or issues that could have been asked but that were not.
Summary

- Physicians interface with the insurance industry in various ways and play critical roles in influencing the health and benefits of individuals and populations.
- Use evidence-based principles, clearly document findings and treatment, address causality and prognosis, and provide detailed restrictions.
- Have timely follow-up with patients if a treater or client if a peer reviewer, and communicate early and often.
- Assess and address potential barriers to recovery early.
- Advocate for your patients by getting to know and collaborating with colleagues in the insurance industry.
